RENEWED PLAN OF OPERATIONS FOR GREEN BEETLE QUARRY

REVISED 07/26/2011

UTU -81125

BOX ELDER COUNTY, UTAH

CLAIMANT:

OAKLEY MOUNTAIN CORP.

1729 S. Hwy. 27

Oakley ID. 83346

208-862-3820

OPERATORS:

LARRY SCRIVANICH

P.O. BOX 2174

WOODINVILLE, WA. 98072

JEFF HALL

1729 S HWY 27

OAKLEY ID. 83346

RECEIVED

AUG 01 2011

DIV. OF OIL, GAS & MINING

QUARRY LOCATION:

Quarry is located approx. 25 miles southwest of Park Valley, UTAH on Hwy 30.

At mile marker 33 turn west [the Rose Bud B L M field office road] follow road 3 miles to the Emigrant Trail turn off.

The road splits stay to the right [northwest] approx. 1½ mile, at the tee in road go to the right [north] follow road for 1 mile thru B L M gate, quarry mill site is 1½ mile to the north.

LEGAL DISCRIPTION:

T. 11 N., R.16 W., SLM

Section 36, W1½SE1¼, SE1¼SE1¼;

T. 10 N., R. 16 W., SLM

Section 1, Lot 1, SE1¼NE1¼

ACCESS:

Quarry access is provided by the existing B L M road also used to access quarries to the north of our claims.

Accesses to the existing disturbed areas are short routes already put in place by the previous claimants.

No new roads would need to be built to access the already disturbed areas.

TOTAL DISTURBANCE:

Disturbance at the Green Beetle Mine should not exceed 10 acres at any given time.

The reclamation at the Northwest pit will be finalized and we will replant the grass seed this fall.

MINE PIT MARKERS:

Mining pit posts will be set at 50' increments they will be green 5' tee posts with the top half's painted florescent pink for mining pit boundaries. Silt fencing has been purchased and will be installed on north end of upper quarry, the stone on the northern face is fractured and is not marketable at this time. Silt fence will be put up as a boundary and deterrent for any loose stone rolling off north face.

PROPOSED START DATE:

Oakley Mountain Corp. is already quarrying in this area. There is no closing date for completion of mining. The quartzite deposits are quite large at the Green Beetle and the mine should be in operation for many years.

Operation of mine is seasonal, usually running from mid spring to early fall. Workers at mine will work weekdays with some weekends depending on inventory or market demands.

PUBLIC SAFETY:

Pits and roads will be bermed when mine is not in operation.

All untrained visitors are required to stay in the loading area, unless accompanied by the mine Supervisor or trained miner.

EQUIPMENT, PERSONAL and SUPPORTING FACILITIES:

The equipment used for stone extraction and transport consists of 1 excavator 1 dump truck and 1 front end loader with bucket and forks.

Fuel and oils will be brought in with a portable trailer with built in containment sides and a polypropylene liner.

Personal will consist of 7 labors working 5 days a week with some Saturdays and 1 Supervisor one day a week.

All workers stay in Park Valley UT. In rented housing.

There will be no need for any structures to be built at mine site, all water and food is brought in on a daily basis.

Workers use a small portable stove to heat meals in a designated area.

Bathroom facilities consist of portable toilets that are cleaned once a week.

MINING OPERATIONS:

Total production is expected to continue at 1500\2000 tons per year.

All waste rock will be used for reclamation.

All saved top soil will be piled separately and used for final reclamation.

Mining method will be open pit single bench with east upper pit being approx. 150' x 250'.

All processing of stone will be in the mine pit, stone will be split and palletized then moved to the loading area where it will be weighed and put into inventory.

TOXIC SUBSTANCES:

No toxic solutions are required for this operation.

WATER:

No water ways should be adversely affected by mining at the Green Beetle.

RECLAMATION:

The Green Beetle Quarry has a B. L. M., U.D.O.G.M. and S. I.T.L.A. approved reclamation plan on file.

SUMMARY:

OAKLEY MOUNTAIN CORP. will be quarrying in the eastern quarry only. Reclamation will continue in the west quarry and will be completed fall of 2011.
